Education

Bachelor of Computing Science (Honours) **August 2021 - August 2024**
University of Technology Sydney (UTS)

- Major: Artificial Intelligence and Data Analytics (WAM 86.58)

Skills

Programming language: SQL, Python, HTML/CSS, Java, PHP, Javascript, C++
Languages: English, Chinese (Native), Cantonese, Malay
Tools / Tools: Git, Node, React, TypeScript, TailWindCSS, Yi Framework, Laravel, Excel, Tableau, PowerBI

Work Experience

Web Developer **May 2025 – Present**
Trivesta, Sydney, NSW, Australia

- Built and maintained full-stack features for a corporate website and internal CRM.
- Built n8n automation workflows to handle client calls and inquiries, reducing manual processing time.
- Built predictive AI/ML churn models achieving 80%+ accuracy, and directly informing client retention strategies.
- Tools: Wordpress, Typescript, React, Vite, PHP, Javascript, Redux, Axios, MySQL, AntDesign, TailwindCSS, n8n, PowerBI

Operation Developer **September 2024 - Present**
Flash Media Solutions, Rydalmere, NSW, Australia

- Developed a modern e-commerce website serving over 20 products and 50 monthly visitors, migrating from a legacy stack to improve performance and maintainability
- Built an automated Excel stock and invoice tracking system that eliminated duplicate records across 250 inventory items.
- Designed Tableau dashboards visualizing sales trends, regional client distribution, and stock velocity.
- Managed client relationships and translated business requirements into technical solutions.
- Tools: PHP, JavaScript, GSAP, WordPress, Excel, Tableau

Research Assistant **August 2024 - December 2024**
La Trobe University, Melbourne, Victoria, Australia

- Developed co-learning MedNext based model for brain haemorrhage detection, achieving 86% accuracy in classifying brain hemorrhage in CT scans.
- Adapted Bal-CE loss and post-hoc logit adjustment to improve class balance and achieved up to 21% improvement in accuracy and 20% in ROC AUC over previous state-of-the-art methods.
- Tools: Python, Docker, Scikit-learn, MedNext, CT Imaging

Technical Support Engineer Intern **January 2020 – Mar 2020**
Net Onboard Sdn Bhd, KL, Malaysia

- Created and organized network cables
- Prepared and deployed servers requested by clients
- Troubleshoot server issue reported by clients
- Deployed testing environment
- Planned and created the network architectures
- Recorded and documented meeting minutes for the technical support department
- Tools: Powershell Script, Linux, Ubuntu, CentOS, Virtual Machines

Projects

2D Drawing to 3D Model Web Tool **Ongoing 2026**

- Built browser-based tool converting 2D canvas drawings into exportable 3D GLB models
- Implemented Three.js extrusion pipeline with direct compatibility for major game engines
- Designed for mobile and desktop with future skeletal rigging support planned (ongoing)
- Tools: Three.js, JavaScript, WebGL, GLB Export

AI Study Assistant **Ongoing 2026**

- Built LLM-powered study platform with PDF upload and personalized concept explanation
- Implemented automated flashcard generation with accurate citation tracking per source
- Centralized fragmented study workflow previously spread across multiple AI chat platforms
- Tools: React, TypeScript, NVIDIA NIM API, PDF Processing, LangChain

Flash Media Website **Ongoing 2026**

- Migrated legacy Magento 1.0 e-commerce site to a maintainable WordPress stack
- Extended Elementor with custom GSAP animations to achieve a premium visual feel
- Delivered CMS architecture independently manageable by non-technical staff
- Tools: WordPress, Elementor, GSAP, HTML, CSS

Trivesta Website **December 2025**

- Built custom WordPress theme from scratch with Tailwind CSS and GSAP animations
- Configured full SEO setup including analytics, sitemap, and canonical links
- Established GitHub Actions CI/CD pipeline for fully automated deployments
- Tools: HTML, Tailwind CSS, JavaScript, WordPress, Figma, GitHub Actions

Gamify Physiotherapy (UNSW Hackathon 2025) **November 2025**

- Built a web app helping patients track and monitor knee rehabilitation exercises
- Integrated MediaPipe pose analysis for real-time exercise form validation feedback
- Developed full-stack solution within a hackathon timeframe at UNSW Kensington
- Tools: Next.js, TypeScript, TailwindCSS, Shadcn UI, Prisma ORM, PostgreSQL, Python, MediaPipe

Online Leave Management System **July 2023**

- Built full-stack Laravel application replacing a manual student leave request process
- Implemented role-based access control for student applicants and lecturer approvers
- Automated approval workflow reducing leave processing to a same-session turnaround
- Tools: Laravel, PHP, MySQL, Bootstrap, Blade

Inventory Management System **October 2025**

- Designed normalized Excel VBA database to replace a broken legacy CSV system
- Automated stock validation, warranty tracking, and aging inventory alert generation
- Eliminated duplicate records across 30 product SKUs entirely
- Tools: Excel VBA, Database Design, CSV Processing
